

Features

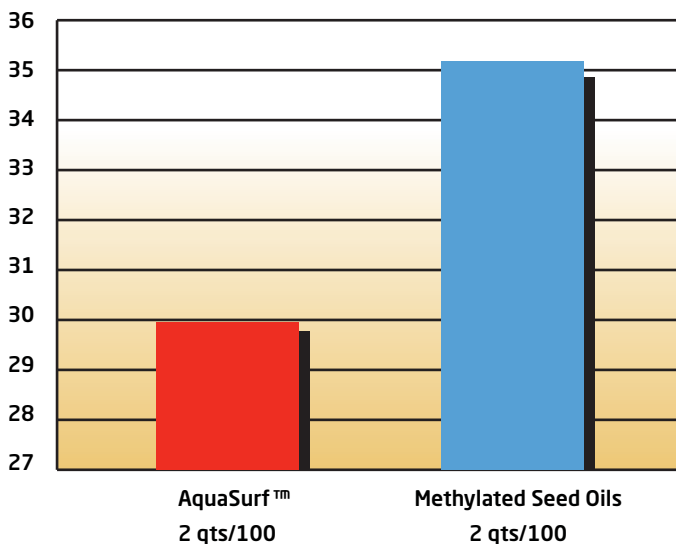

AQUASURF helps kill more weeds faster. Designed for use in aquatic weed management, AQUASURF is an eco-friendly spreader adjuvant that boosts herbicide performance and is designed to be less harmful to fish and other aquatic organisms.

AQUASURF helps reduce liquid surface tension, and in turn, allows the herbicide to spread over more of the plant surface area. This results in better, more even coverage and improved overall performance.

- 90% active, eco-friendly, nonionic spreader
- Virtually non-toxic to Trout and Daphnia
- Helps reduce excess foam in spray tank

AQUASURF Reduces More Surface Tension, For Improved Foliar Coverage

Trial: Aquasurf vs. MSO Competitor Surface Tension Dynes/CM

Application Rates and Instructions

Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Typical application rate is 1-4 pints per 100 gallons of finished spray solution. For improved efficacy, use at least ½ pint per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use ½ fl. oz. per gallon of finished spray solution. Please read complete label instructions before use.
