

**SUPPLEMENTAL LABELING
FOR DISTRIBUTION AND USE ONLY IN CALIFORNIA
RIVERDALE DRI-CLEAN® HERBICIDE
EPA SLN. NO. CA-976033**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at time of pesticide application. Read the label affixed to the container of Riverdale Dri-Clean® Herbicide, EPA Reg. No. 228-260, before applying. Use of this product according to this supplemental labeling is subject to all use precautions and limitations imposed by the affixed label.

CITRUS - BROADLEAF WEED CONTROL

Under trees established in the grove at least one year.

Use 18 to 27 ozs. of Dri-Clean® Herbicide in 10 to 100 gallons of water to treat one acre. For band or spot treatment calculate rates according to the actual portion of acre treated. Apply as a directed spray onto the weeds to point runoff when weeds are young and actively growing (early weed emergence to early bud stage). Repeat applications through the growing and dormant season as needed.

Application: Ground application only using low silhouette or shielded sprayer to avoid contact with green plant tissue. Use with a drift retardant to increase deposition and reduce drift. Make up to two applications through the dormant or growing seasons as needed. Do not harvest citrus within 40 days of application. Do not graze or feed cover crops from treated orchards to livestock.
