

Manni-Plex® Eagle

Build Stronger, Healthier Turf

Applying the right combination of nutrients produces outstanding greens and tees. MANNI-PLEX foliar nutrients were designed to deliver nutrition quickly and efficiently. Their small molecular size and weight helps get more nutrition into turf growth points for better results.

Key Benefits of MANNI-PLEX EAGLE

Efficiency

- Quickly supplies readily available N, K, Fe and Mn to turf
- Proprietary formulation coats leaves and sticks to the surface, making nutrients available longer

Effectiveness

- Builds strong, healthy and vibrant turf
- Enhances root mass and growth
- Helps turf better withstand stress
- Delivers consistent results

Easy to Use

- Ready-to-use liquid formulation
- Compatible with most fungicides, insecticides and PGR's
- May applied using ground equipment, through fertigation or as a soil drench

Small particle size and low molecular weight allow nutrients to move to plant growth points quickly.

Guaranteed Analysis

Total Nitrogen (N)	7.00%
7.00% Urea nitrogen	
Soluble Potash (K ₂ O)	14.00%
Iron (Fe)	0.50%
0.50% Chelated Iron	
Manganese (Mn)	0.25%
0.25% Chelated manganese	

Derived from urea, potassium carbonate, iron ethylenediaminetetraacetate (EDTA) and manganese EDTA.

F76

Application and Use

MANNI-PLEX® should be applied to actively growing plants and turf throughout the year. For best results apply early morning or late evening.

Turf (Commercial):

Green & Tees: 8-16 fl oz per 1,000 sq ft.

Fairways & Sports Turf: 2-5 gal per acre.

Overseeding: 8 fl oz per 1,000 sq ft after germination.

Sod Installation: 8 fl oz per 1,000 sq ft at installation.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil test or plant analysis recommendation.

For more information, see BRANDT's Summer/Winter Success Spray programs and always read full labels before use.
