

NORDOX

SUPER MICRONIZED FUNGICIDE

ACTIVE INGREDIENT:

Cuprous Oxide (Cu ₂ O)*	. 56.4%
OTHER INGREDIENTS:	43.6%
TOTAL	100.0%

*Metallic copper equivalent: 50.1%

EPA Reg. No. 48142-1

EPA Est. No. 48142-NR-1

Manufactured by:

NORDOX Industrier AS • Oslo, NORWAY c/o Monterey Chemical Co. • P.O. Box 35000 • Fresno, CA 93745-5000

Net Contents:

CAUTION

FIRST AID

IF SWALLOWED: Drink 1 or 2 glasses of water or milk and induce vomiting by touching back of throat with finger or blunt object. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

IF IN EYES: Flush eyes with water for at least 15 minutes, holding eyelids apart. Seek medical attention immediately.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing dust or vapors. Avoid contact with skin, eyes, and clothing. Do not store near feed or food stuffs.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

- · Long sleeved shirt and long pants
- Waterproof gloves

Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

STATEMENT OF WARRANTY

NOTICE: Read this Statement of Warranty before buying or using this product. If the terms are not acceptable, return it at once unopened.

It is critical that this product be used and mixed only as specified on the label. The laws of a State may make some or all of this paragraph inapplicable or may give you rights in addition to your rights hereunder. Except to the extent prohibited by applicable law, the exclusive remedy of the User or Buyer and the limit of liability of this Company or any other Seller for any and all losses, personal injuries or damages resulting from the use of this product, shall be the purchase price paid by the User or Buyer for the quantity of product involved. Except to the extent prohibited by State Law, there is no warranty, and this Company and other Sellers disclaim all liability for losses, personal injury or damages: (i) arising from any use of this product in a manner or for a purpose not recommended in its label directions, or from mixing this product before use with any substance except as recommended by the product's label; (ii) arising from handling or storage in violation of label instructions; (iii) for all indirect special or consequential damages; (iv) when not reported to this company within one year of discovery; and (v) arising from product not used within the label-designated shelf life or four years from date of purchase, whichever first occurs. THERE ARE NO IMPLIED WARRANTIES AND NO WARRANTIES OF MERCHANTABILITY OR FITNESS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

NOTE: This is a specimen label for electronic distribution. Refer to product label on container for specific directions for use.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- · Shoes plus socks
- · Waterproof gloves

GENERAL INSTRUCTIONS

The per acre use rates for NORDOX are applicable for dilute, concentrate and aerial sprays. Where dosage and/or interval ranges are indicated, these may be adjusted according to disease conditions. For example, when conditions favor severe disease pressure, use the maximum rate and shortest spray interval. Do not apply less than the minimum recommended dosage.

MIXING

Add the required amount of NORDOX to a spray tank partially filled with water and agitate mixture to maintain a uniform suspension. Spreader/stickers, insecticides, nutrients, etc., should be added last. Observe all cautions and limitations on labels of all products used in mixtures.

MINIMUM RECOMMENDED SPRAY VOLUME (GALLONS) PER ACRE

	AERIAL	GR	OUND
		Dilute	Concentrate
Vegetables	3	20	3
Tree Crops	10	400	50
Citrus	10	800	100
Vines	10	200	25

CHEMIGATION: DO NOT apply this product through any type of irrigation system.

		FRUIT AND	NUT CROPS
CROP	DISEASE	RATE	REMARKS
CITRUS	Fruit rot Greasy spot (pink pitting) Melanose Spot anthracnose (scab)	4-20 lbs/A	Apply as pre-bloom and post-bloom sprays.
	Brown rot Septoria spot	4-20 lbs/A	Apply in the fall just before rainy season. Apply as an overall or skirt spray and to soil beneath the trees. Use with lime in areas where copper injury is known to occur.
	Citrus canker (suppression only)	12 lbs/A	Spray flushes 7-14 days after shoots begin to grow. Young fruit may require an additional application. Number and timing of application will be dependent upon disease pressure. Under heavy pressure, each flush of new growth should be sprayed.
COCOA	Black pod rot	2-4 lbs/A	Apply on 14-21 day schedule in high rainfall areas.
COFFEE	Iron spot Pink disease	2-8 lbs/A	Apply 3 applications at monthly intervals at the beginning of the wet season.
	Bacterial blight (<i>Pseudomonas</i>) Berry spot Leaf rust Leaf spot	31/ ₂ -8 lbs/A	Apply as locally recommended, usually at 3-4 week intervals depending upon disease severity and rainfall conditions.
CRANBERRIES	Fruit rot	8 lbs/A	Begin application in late bloom. One to two additional applications at 10-14 day intervals may be necessary
	Red leaf spot Stem and leaf blight Tip blight (<i>Monilinia</i>)	8 lbs/A	Apply delayed-dormant spray in the spring. Repeat as needed through pre-bloom.
	Bacterial stem canker	8 lbs/A	Apply postharvest and again in the spring before bud burst. One or two additional applications at 10-14 day intervals may be required depending upon disease severity.
CURRANTS, GOOSEBERRIES	Anthracnose Leaf spot (cane blight)	5-10 lbs/A	Make 3 applications starting after harvest, before bloom and after petal fall.
FILBERTS	Bacterial blight	12-20 lbs/A	Apply after harvest. Under severe conditions, apply again when 3/4 of the leaves have dropped.
	Eastern filbert blight	12-20 lbs/A	Apply as a dilute spray in adequate water for thorough coverage. Make initial application after harvest in October before heavy rains begin. The next application should be made in late February to early March followed by another application 1 month later. If desired, add 1 pint of a sticking agent or superior type oil per 100 gallons of water. Use higher rates when rainfall is heavy and disease pressure is high.
GRAPES	Black rot Downy mildew Powdery mildew	2 lbs/A	Apply just before bud break, when the shoots are 6-8 inches long, just after bloom, and every 4-10 days throughout season as needed. Foliar injury may occur on coppersensitive varieties.
HOPS	Downy mildew	2 lbs/A	Apply as needed at 10 day intervals. Begin with crown treatment (after pruning but before training) and continue until 2 weeks before harvest.
KIWI	Bacterial leaf spot and blossom blight Bleeding canker Erwinia herbicola	8 lbs/A	Apply in 200 gallons of water per acre. Make applications on a monthly basis. A maximum of 3 applications may be made.
MANGOS	Anthracnose	4-5 lbs/A	Apply monthly after fruit set until harvest.
OLIVES	Anthracnose Olive knot Peacock spot	8-12 lbs/A	Apply prior to winter rains. A second application in the early spring should be made under severe disease symptoms.
PEACHES, NECTARINES	Bacterial blast (<i>Pseudomonas</i>) Brown rot blossom blight Coryneum blight (shot hole) Leaf curl	8-20 lbs/A	For bacterial blast, leaf curl, and shot hole, apply in dormant / delayed-dormant sprays. For brown rot and shot hole, apply before bud swell in the full pink bud stage.
	Bacterial spot	6-8 lbs/A	Apply as a dormant spray.
	CV	1 lb/A	Apply at post-bloom at first and second cover sprays. Slight injury to the foliage may occur with post-bloom sprays.
PECANS	Shuck and kernel rot Zonate leaf spot	4-10 lbs/A	For suppression, apply in sufficient water to ensure complete spray coverage at 2-4 week intervals starting at kernel growth and continuing until shucks open. Use the higher rate and shorter interval if frequent rainfall occurs.
PEARS, QUINCE	Fire blight	1-2 lbs/A	Apply at 10% bloom and repeat at 5-7 day intervals during the bloom period. Do not use on copper sensitive varieties.
	Blossom blast (Pseudomonas)	8-16 lbs/A	Apply as a dormant spray. Apply only at bud break to control primary infection.
PISTACHIOS	Alternaria late blight	8-20 lbs/A	Apply at 50% and full bloom followed by up to 3 application at 30 day intervals.
	Botrytis blight Botryosphaeria panicle and shoot blight Septoria leaf blight	8-20 lbs/A	Make initial application at bud swell and repeat on a 14-28 day schedule as dictated by disease conditions. If disease conditions are severe, use the higher rate and shorter interval.
PLUMS, PRUNES	Brown rot blossom blight Coryneum blight (shot hole)	12-20 lbs/A	Apply as a dormant spray before heavy rains begin. For brown rot, apply at early green bud to full popcorn stages.
	Bacterial blast (<i>Pseudomonas</i>) Bacterial canker	12-16 lbs/A	Apply at dormant to early pink stage. Where disease is severe, apply 1 lb. at 2 week intervals post-bloom. Slight leaf injury may occur.
WALNUTS	Walnut blight	8-12 lbs/A	Apply at early pre-bloom when catkins are partially expanded. Repeat applications at 7-14 day intervals or more frequently if rainfall occurs.

CITRUS - Field Nursery Grown

To control melanose, scab, pink pitting, greasy spot, and brown rot and to suppress citrus canker, apply 2 pounds of NORDOX per 100 gallons of water (4-8 lbs/A). Apply NORDOX at 28 day intervals or as needed depending on disease severity.

TURFGRASS

To control algae in turfgrass, apply ½ pound NORDOX per 1,000 square feet in 5 gallons of water. NORDOX may be used alone or in combination with other registered fungicides as a maintenance spray. Observe all precautions and limitations on the label of each product used in tank mixes.

NOTE: Phytotoxicity may occur depending upon varietal differences. Apply the recommended rate to a small area and observe for 7-10 days for signs of injury. If phytotoxicity occurs, discontinue use. Do not apply in a spray solution with a pH of less than 6.5.

NOTE: This is a specimen label for electronic distribution. Refer to product label on container for specific directions for use. FIELD AND VEGETABLE CROPS

		FIELD AND VE	GETABLE CROPS
CROP	DISEASE	RATE	REMARKS
ALFALFA	Leaf spot	2-4 lbs/A	Apply by ground or air 10-14 days prior to harvest. Slight injury may occur to sensitive varieties.
BEANS, PEAS, LENTILS (succulent and dry)	Anthracnose Bacterial blight (halo blight) Cercospora leaf spot Downy mildew	1-4 lbs/A	Begin applications by ground or air when plants are 5-6 inches high and repeat at 7-14 day intervals.
BEETS, SUGARBEETS	Downy mildew Cercospora leaf spot	1-3 lbs/A	Apply by ground or air when disease first appears and repeat at 7-14 day intervals. May be tank mixed with sulfur to enhance control.
CARROTS	Alternaria leaf spot Blight Cercospora leaf spot Downy mildew	2-4 lbs/A	Apply by ground or air when disease appears and repeat at 7-14 day intervals.
CELERY	Bacterial blight Early and late blight	2-4 lbs/A	Apply by ground or air when disease appears and repeat at 7-14 day intervals.
CRUCIFERS [Broccoli, Brussels sprouts, Cabbage,	Black leaf spot Black rot	1-3 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
Cauliflower, Greens (Collard, Mustard, and Turnip)]	Downy mildew d	½-1 lb/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
CUCURBITS [Cantaloupe, Cucumber, Honeydew, Muskmelon, Pumpkin Squash, Watermelon]	Powdery mildew	1½-2 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
EGGPLANT	Watermelon bacterial fruit blotch Alternaria blight Anthracnose	2-4 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
LETTUCE	Pruit rot Downy mildew	1-2 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals. Slight injury may occur under adverse weather conditions.
ONIONS	Downy mildew Purple blotch	2-4 lbs/A	Apply by ground or air when plants are 4-6 inches high and repeat at 7-10 day intervals.
PEANUTS	Cercospora leaf spot	1½-3 lbs/A	Apply by ground or air when disease appears and repeat at 7-14 day intervals. May be tank mixed with sulfur to enhance control.
PEPPERS	Anthracnose Bacterial spot Downy mildew Early blight Late blight Leaf spot	2-4 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
POTATOES	Early blight	1-6 lbs/A	Apply by ground or air at 7-10 day intervals when plants are 6 inches high until harvest.
	Late blight	2-4 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
SPINACH	Anthracnose Black leaf spot Cercospora leaf spot Downy mildew (blue mold) White rust	2-3 lbs/A	Apply by ground or air when disease appears and repeat at 7-10 day intervals.
STRAWBERRIES	Leaf spot Bacterial leaf blight	5-8 lbs/A 2-3 lbs/A	Begin application when plants are established and continue on a weekly schedule Begin application when plants are established and continue on a weekly schedule
TOBACCO	Angular leaf spot	4-5 lbs/A	Apply on 7-10 day basis when disease appears. Destroy all infected plants.
	Blue mold	2 lbs/A	Apply every 7-10 days when disease appears.
	Brown spot	4-5 lbs/A	Apply every 7-10 days when disease appears.
	Damping off disease	5-6 lbs/A	Avoid overwatering. Dust the seed bed after planting.
	Frog eye disease	4-5 lbs/A	Apply just before transplanting and when topped.
	Wild fire	2 lbs/A	Apply every 7 days from seeding to transplanting.
TOMATOES	Anthracnose Bacterial canker Bacterial speck Bacterial spot Early and late blight Grey leaf spot Leaf mold Septoria leaf spot	2-4 lbs/A	Apply by ground or air prior to the appearance of disease and repeat at 7-10 day intervals.
WHEAT, OATS, BARLEY	Helminthosporium spot blotch Septoria leaf blotch	1½-2 lbs/A	Make first application at early heading and follow with second spray 10 days later. Use the higher rate when conditions favor disease.

SNAIL REPELLENT FOR TREE AND VINE CROPS

For all Tree and Vine crops, mix 10 lbs. NORDOX with 2 gallons carrier (water, linseed oil, latex paint) and paint or spray a 3-4" band onto tree trunk at 6-12" height above soil surface. Repeat as necessary. Slight injury (cracking of bark) may occur on young trees or tree trunks exposed to direct sunlight.

FROST INJURY PROTECTION

Bacterial Ice Nucleation Inhibitor - Application of NORDOX made to all crops listed on this label at rates indicated on this label, just prior to anticipated frost conditions, will sustain control of ice nucleating bacteria (*Pseudomonas syringae, Erwinia herbicola* and *Pseudomonas fluorscens*) and may therefore provide protection against light frost. Not recommended for those geographic areas where weather conditions favor severe frost.

		MISCEL	LANEOUS
CROP	DISEASE	RATE	REMARKS
ATEMOYA	Anthracnose	3 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
CARAMBOLA	Anthracnose	6 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
CHIVES	Downy mildew	2 lbs/A	Begin applications when plants are first established in the field. Repeat applications every 7-10 days as dictated by disease conditions. If disease pressure is high, use the shorter spray interval.
DILL	Phoma leaf spot Rhizoctonia foliage blight	3 lbs/A	Begin applications when plants are first established in the field and repeat at 7-10 day intervals depending upon disease severity and environmental conditions. If disease pressure is high, use the shorter spray interval.
DOUGLAS FIR	Rhabdocline needlecast	2 lbs/A	Begin applications at bud break and repeat at 3-4 week intervals. Apply in a tank mix with another registered pesticide if moderate to severe disease pressure is present.
GINSENG	Alternaria leaf and stem blight	3 ½ lbs/A	Use as a tank mix with 2 pounds Rovral 50W in 100 gallons of water. Begin NORDOX / Rovral applications as soon as plants have emerged in spring. Applications should be repeated every 7 days until plants become dormant in fall. If scheduled application is to be before a rain shower, apply fungicides at least 8 hours before the rain, giving the fungicides time to dry on the plants. Use of a spreader-sticker is advised. NOTE: Alternaria leaf and stem blight is most severe in humid conditions such as those found in the dense canopies of 2-, 3-, and 4-year old Ginseng. It is very important that the stems be thoroughly covered with fungicide; therefore, use a spray apparatus which distributes the fungicide throughout the canopy.
GUAVA	Anthracnose Red algae	3 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
LITCHI	Anthracnose	3 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
LIVE OAK	Ball moss	6 lbs/A	Apply 6 lbs per 100 gallons of water in the spring when ball moss is actively growing, using 1.5 gallons of spray per foot of tree height. Make sure to wet ball moss tufts thoroughly. A second application may be required after 12 months. NOTE: NORDOX may be injurious to ornamentals grown under Live Oaks. This product may be reactive on metal and masonry surfaces such as galvanized roofing. Avoid contact with metal surfaces. Do not spray on cars, houses, lawn furniture, etc.
MACADAMIA	Anthracnose	6 lbs/A	Initiate sprays at first sign of flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
	Phytophthora blight (<i>P. capsici</i>) Raceme blight (<i>Botrytis cinerea</i>)	4½-6 lbs/A	Apply during raceme development and bloom periods. Apply in sufficient water for thorough coverage.
MAMEY SAPOTE	Anthracnose Algal leaf spot	6-8 lbs/A	Apply when conditions favor disease. Repeat on 14-30 day schedule as disease severity and environmental conditions dictate.
PAPAYA	Anthracnose	4-10 lbs/A	Begin applications before disease appears and repeat at 10-14 day intervals. Apply at 5-7 day intervals during periods of heavy rainfall. Use higher rates when conditions favor disease.
PARSLEY	Bacterial blight	3 lbs/A	Begin applications when plants are first established in the field and repeat at 5-7 days intervals depending upon disease severity and environmental conditions.
PASSION FRUIT	Anthracnose	6 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
SUGAR APPLE (Annona)	Anthracnose	12 lbs/A	Make initial application just before flowering and repeat on a weekly schedule until just before harvest. Apply in sufficient water for thorough coverage.
SYCAMORE	Anthracnose	2-3 lbs/A	Apply as a full coverage spray. Apply in 100 gallons of water or sufficient volume for thorough coverage. Make first application at bud crack and second application 7-10 days later at 10% leaf expansion.

GREENHOUSE AND SHADE HOUSE CROPS

Notice to User: NORDOX may be used in greenhouses and shade houses to control diseases on some crops which appear on this label. The grower should bear in mind that the sensitivity of crops grown in greenhouses and shade houses differ greatly from crops grown under field conditions. Neither the manufacturer nor the seller has determined whether or not NORDOX can be used safely on all greenhouse and shade house-grown crops. The user should determine if NORDOX can be used safely prior to commercial use. In a small area, apply the recommended rates to the plants in question, i.e. foliage, fruit, etc., and observe for 7-10 days for symptoms of phytotoxicity prior to commercial use.

Apply NORDOX according to specific rates given for those crops in pounds per acre or pounds per 100 gallons. Two level teaspoons of NORDOX per 1000 square feet is equivalent to 1 pound per acre.

CROP	DISEASE	RATE / 1000 sq.ft.	REMARKS
Eggplant	Alternaria blight Anthracnose Phomopsis	4-8 tsp	Begin applications prior to development of disease symptoms. Repeat sprays at 7-10 day intervals or as disease pressure dictates.
Pepper	Bacterial spot	4-8 tsp	Begin application when conditions first favor disease development and repeat at 5-10 day intervals as needed depending on disease severity.
Tomato	Anthracnose Bacterial speck Bacterial spot Early and late blight Gray leaf mold Septoria leaf spot	4-8 tsp	Begin applications when disease first threatens and repeat at 7-10 day intervals or as needed depending on disease severity.
Citrus (non-bearing nursery)	Brown rot Citrus canker Greasy spot Melanose Pink pitting Scab	3-12 Tbsp	Begin applications when disease threatens. Repeat at 30 day intervals or as needed depending on disease severity.

NOTE: This is a specimen label for electronic distribution. Refer to product label on container for specific directions for use.

ORNAMENTALS

Notice to User: Plant sensitivities to NORDOX have been found to be acceptable in specific genera and species listed on this label, however, it is impossible to know sensitivities under all conditions and phytotoxicity may occur. Due to the large number of species and varieties of ornamentals and nursery plants, it is impossible to test every one for sensitivity to NORDOX. Neither the manufacturer nor seller recommends use upon species not listed on the label nor has it been determined that NORDOX can be safely used on ornamental or nursery plants not listed on this label. The user should determine if NORDOX can be used safely prior to commercial use.

Use NORDOX on container, bench, or bed-grown ornamentals in greenhouses, shade houses or outdoor nurseries, for professional use on ornamentals grown in indoor and outdoor landscaping, and for control of bacterial and fungal diseases of foliage, flowers, and stems.

One level teaspoon of NORDOX per gallon of water is equivalent to 1 pound per 100 gallons. Apply as a thorough coverage spray using 1 pound NORDOX per 100 gallons of water. Begin application at first sign of disease and repeat at 7-14 day intervals as needed; use shorter interval during periods of frequent rains or when severe disease conditions persist.

NORDOX may be used alone or in combination with other registered fungicides as a maintenance spray. Observe all precautions and limitations on the label of each product used in tank mixes. NOTE: Do not tank mix NORDOX with Aliette fungicide unless appropriate precautions have been taken to buffer the spray solution. Severe phytotoxicity may result if adequate precautions are not taken.

- (1) Discoloration of foliage and/or blooms has been noted on some varieties. To prevent residues on commercial plants, do not spray just before selling season
- (2) Apply NORDOX at 3-5 pounds per acre in 20-100 gallons water per acre.
- (3) For India Hawthorn use 2-4 pounds per 100 gallons or 2-4 level teaspoons per gallon.
