

BRANDT® UPTAKE ADVANCED

Advanced Compatibility Liquid Humic Acid

BRANDT UPTAKE ADVANCED is a pure, high-quality, non-alkaline liquid humic acid. The patent pending, low pH formulation was designed for advanced compatibility and solubility with fertilizers and crop protectants.

BRANDT Uptake Advanced Advantages

- Helps growers improve crop quality and yield potential when challenging soil conditions are present
- May be used on a variety of cropping systems
- Compatible with most liquid fertilizers used in all types of fertigation systems, including:
 - NPK acid-based fertilizers
 - Different sources of Calcium such as CAN 17 and CN 9
 - Different sources of Magnesium
 - Different sources of micronutrients, including Chlorides, Sulfates and Nitrates
- Compatible with most acids used as a nutrient source or as line cleaners, including: phosphoric acid; nitric acid, sulfuric acid and more
- Compatible with most crop protectants and phosphite based products when used as a foliar application.

For a complete and unique source of Phosphorous fertilizer, apply BRANDT UPTAKE ADVANCED with BRANDT STERIC P or BRANDT REACTION® P.

Contains Nonplant Food Ingredient

Active Ingredient

6.0% Humic Acid derived from leonardite ore

94.0% Inert ingredients

Application Rate and Timing

BRANDT UPTAKE ADVANCED may be used as a soil or foliar spray. It may be applied at anytime during the crop cycle, from planting to harvest. For foliar applications, apply 1-4 quarts per 10-100 gallons of water per acre throughout the growing season. For fertigation, apply through irrigation systems at a 1-2 gallon per acre rate. Do not mix with 10-34-0 or 11-37-0 or thio sulfate based products. Please read and follow full label instructions before use.
