

BRANDT® Sequestar® Chelated Nutrients

Protect Your Nutrient Investment

BRANDT Sequestar offers a range of high quality, fully chelated EDTA, EDDHA and DTPA micronutrients available in liquid and dry soluble formulations. The chelation is designed to protect nutrients and prevent them reacting and binding with other elements in the soil and other fertilizers. This protection helps ensure nutrient availability to the plant.

BRANDT Sequestar formulations can withstand and perform in challenging soil conditions, such as high alkaline calcareous soils. They also have superior tank mix flexibility and compatibility; and will perform in difficult tank mix situations, such as neutralized orthophosphate solutions.

Key Advantages of BRANDT Sequestar

- Ideal for use with liquid starter fertilizers and as a foliar application in difficult tank mixes
- Superior compatibility with:
 - Almost all NPK fertilizers
 - Thiosulfate solutions
 - Orthophosphates, Polyphosphates
 - High pH solutions
 - Nitrogen and SRN solutions
- Application flexibility. May be mixed directly into growing media, applied as a soil drench or added to fertigation systems.
- More efficient than other forms of nutrients; up to 6x ratio in harsh soil conditions

Select BRANDT Sequestar Formulations Are Now Approved Tank Mix Partners for Enlist Duo®

The following formulations have been approved as tank mix partners with the 2,4-D based herbicide, Enlist Duo:

- BRANDT Sequestar 4.5% Fe EDTA
- BRANDT Sequestar 6% Mn
- BRANDT Sequestar 9% Zn
