

BRANDT® Umbrella

Improves Pesticide Effectiveness thru Pivot Irrigation

BRANDT UMBRELLA is a premium 100% active non-ionic polymeric terpene resin based spreader and sticker. Specialized foliar retention agents form a weatherable film upon drying. BRANDT UMBRELLA may be used on agricultural, forestry, turf and ornamental, industrial, structural and non-cropland sites.*

Dry Beans Trial, Washington, 2015

The fungicide Topsin® 4.5FL was applied on dry beans through center pivot in 0.13 acre inches water. The fungicide applied together with BRANDT Umbrella at 8 ounces per acre was compared to the fungicide applied alone to determine if there would be an increase in fungicide residue levels on the bean plants. Tissues pulled 1 day after application showed more than 2X relative fungicide active ingredient residue levels on the plants treated with the addition of BRANDT Umbrella compared to the fungicide applied alone.

*Not for aquatic use in Washington

Principal Functioning Agents

Terpene resins, Tall oil fatty acids and Alkyl phenol ethoxylate. 100%

Rate Recommendations

Application Rate

For use as a spreader/sticker

Air or ground

4-16 fl oz (per acre)

Backpack or handheld sprayer

0.5 fl oz (per gallon of finished spray solution)

For improved efficacy, use at least 4 fl oz per acre when finished spray volume is less than 20 gallons per acre.

For use with sprayable pheromones

Air or ground

up to 3% of the finished spray solution

Mix with sufficient water for adequate coverage of the crop according to the pesticide label.
