

BRANDT GlucoPro

Pepper Trial

11.0% yield increase (1,694 lbs/ac)
over the check

BRANDT GlucoPro applied as foliar at a rate of 10 oz/ac, showed a statistically significant yield advantage of **1,694 lbs/ac** - an **11.0%** increase over the untreated check.

Trial Parameters

Year	2017
Treatments	1. Untreated Check 2. BRANDT GlucoPro 10 oz/ac, 2 foliar applications

Trial Results

Yield (lb/ac)	11.0% Increase
BRANDT GlucoPro	17,065.7
Check	15,371.2

Application Recommendation For Peppers

For soil applications at or immediately prior to transplanting, use 10-20 fl oz per acre

AND/OR

Make foliar applications at 6-12 fl oz per acre; first application at first green fruit, then 1-2 more sprays on 2 week intervals as needed
